a. Home Area

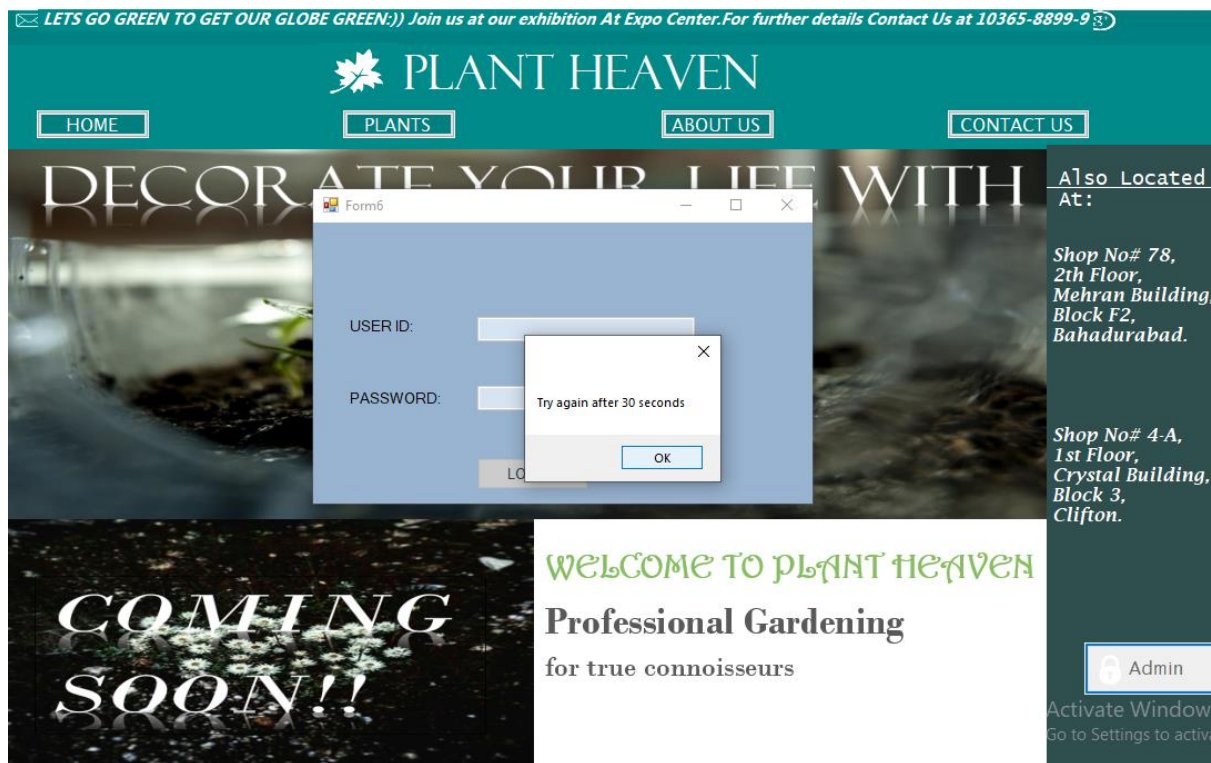

b. Admin Login area

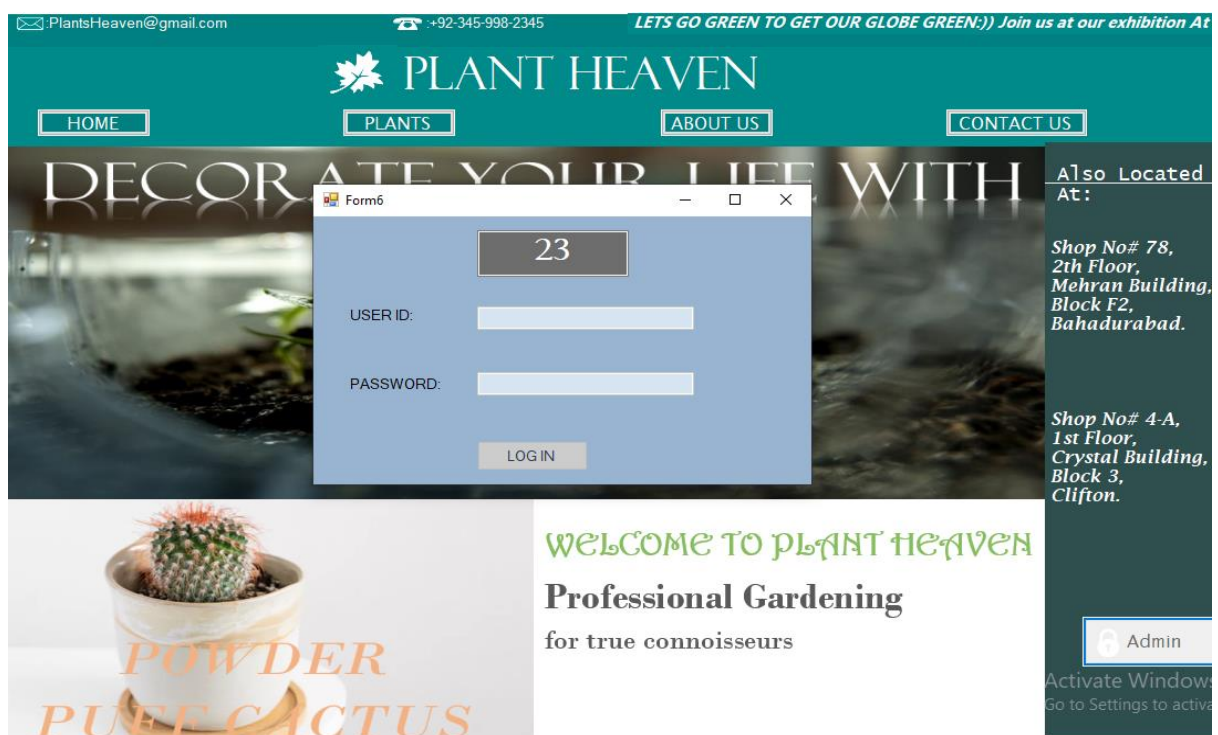

A screenshot of a web form for admin login. The form is set against a light blue background. It contains two input fields: one for 'USER ID:' and one for 'PASSWORD:'. Below these fields is a button labeled 'LOG IN'.

A screenshot of the 'PLANT HEAVEN' website. The header is teal with a white leaf logo and the text 'PLANT HEAVEN'. Navigation links include 'HOME', 'PLANTS', 'ABOUT US', and 'CONTACT US'. A banner image shows a terrarium with the text 'DECORATE YOUR LIFE WITH'. On the right, a sidebar lists 'Also Located At:' with two addresses: 'Shop No# 78, 2th Floor, Mehran Building, Block F2, Bahadurabad.' and 'Shop No# 4-A, 1st Floor, Crystal Building, Block 3, Clifton.' Below the banner, there's a section for 'WHITE BATFLOWER PLANT' with a close-up image. A 'WELCOME TO PLANT HEAVEN Professional Gardening for true connoisseurs' message is displayed. A 'Form6' window is open in the center, showing the login form from the previous image. A 'Login Failed' dialog box is overlaid on the form, displaying a red 'X' icon and the message 'Invalid User ID Or Password' with an 'OK' button. At the bottom right, there's an 'Admin' button and a 'Go to Settings to activate' link.

**After 3 attempts the login area becomes disabled for 30 seconds.*

DESCRIPTION

Even though they are commonly called palms and appear to be, the Sago palm is not a true palm, but belongs to an ancient group of plants called cycads. Cycads are a very primitive group of seed-bearing plants more closely related to conifers than to palms. They are very slow growing, usually only producing one set of leaves per year, and taking several years to develop a "trunk" of much size.

PLACEMENT

Place in an indoor location receiving very bright light year around, preferably with three or more hours of direct or lightly filtered sunlight. Ideal temperatures are from 60° to 75° F, but higher temperatures are tolerated. The minimum night temperature should be 50° F, or above. Your Sago bonsai may be moved outdoors in the spring when minimum temperatures exceed 50° F, and returned indoors in the fall before the first frost. Outdoors, place the bonsai in light shade in an area protected from wind. If your Sago has been in a lower light situation indoors, do not expose it to direct sunlight outdoors or

WATERING

When the weather is warm, water thoroughly when the top half inch of soil has dried. Do not keep the soil to wet or soggy which can lead to root rot. During cooler months, watering may be reduced to allow the soil to become nearly dry before watering again.

FERTILIZING

Fertilize every six weeks between spring and mid-summer, using regular houseplant food at half strength. After the leaves have dried off, follow up by spraying the leaves with an insecticide for houseplants

[ABOUT US](#)
[CONTACT US](#)

The nursery construction started in 1975 and opened its doors in the Spring of 1976. The initial business plan originated from a final college business project and laid the foundation for what was to come. From 1976 to 1983, the nursery provided landscaping services in addition to retail nursery sales. However, in 1984, landscaping was dropped in order to concentrate on expanding the nursery facility. As the expansion continued with the building of a barn to house equipment and storage and leasing a growing area, we felt that it was time to get more land to expand our capability to grow even more plants at the quality we desired. In 1987, we purchased an adjacent parcel of land and added two 90' greenhouses. This made it possible to grow the majority of our annuals and perennials.

The years 1990 and 1991 started the expansion of our retail area with the tearing down of the original small glass greenhouse and adding a large Nexus Greenhouse and expanded Garden Shop. Because of all of the demand, our eye was always on how to make things more efficient, shopping more pleasurable and no lines at the checkout! With that in mind we expanded the point of sale system and finally, in 2006-2007 made a large addition resulting in more Garden Shop space with adequate checkout facilities, public bathrooms and better parking. This is the facility that we have today.

From the original business model to where we have come today, we have always wanted to provide you with the highest quality plants and service, to enable you to be successful with your garden and landscape. We have also created beautifully landscaped areas to browse through and make your experience enjoyable. That was our goal in 1975 and it is our goal today. Before you stop by, be sure to browse all of the informational articles, they are there to educate you so you can create the garden that you have always wanted. As always, our knowledgeable and friendly staff are here to help, so if you have any questions don't be afraid to ask.
